

Label and ribbon printer

Create personalised,
stylish labels and
beautiful ribbons

P-touch CUBE Plus

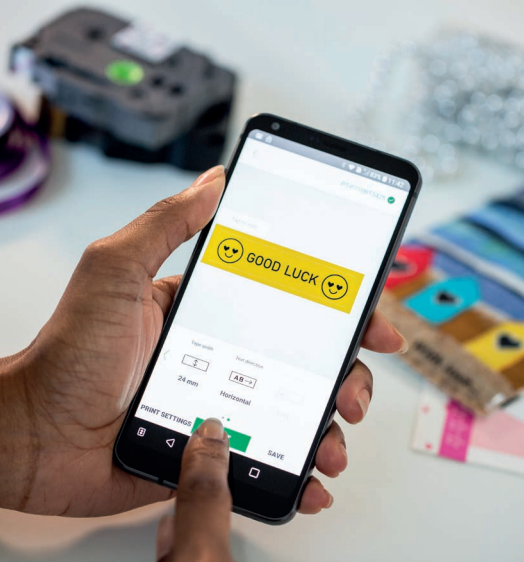

Organise your home and create personalised gifts

The compact home label and ribbon printer for you and your family

When people discover Brother P-touch label printers for the first time, they wonder how they managed without one. Take your home organisation to a new level though the power of labelling. Impress friends and family with personalised gifts and presents. If it's your child's lunchbox or your homemade jam that needs a label, the P-touch CUBE Plus will prove itself invaluable time and time again.

The convenience of Bluetooth

The P-touch CUBE Plus is your personal label printer. Connect directly to your smartphone by simply selecting the printer from your Bluetooth devices. Then launch the app and get labelling. So quick, and so easy!

Design and print labels straight from your smartphone

Free Design&Print app for Apple and Android devices

Why learn a new device, when you already use your smartphone? Create your design in our free P-touch Design&Print app. Choose from the many pre-made labels or create your own. Select your favourite font. Add emoji and clip-art. Include a frame around your text. The future of labelling is right at your fingertips.

Share the love. Share the joy

Share your family's special moments, no matter how far away they are. Print a personal QR code label to stick onto their cards and gifts. When they scan the QR code on their phone, it magically shows your special family video or photos, bringing a smile to their faces, and you closer together.

The future of labelling is right at your fingertips

Recharge from USB. Always ready to print

Most label printers use a lot of power, needing frequent battery replacement. As well as the expense, there is also the environmental impact. The P-touch CUBE Plus is different. Its powerful li-ion battery recharges from your computer, or an AC to USB plug adapter.

More design options from your PC or Mac

If you prefer, the P-touch CUBE Plus label printer can connect to your computer via USB. Using the free P-touch Editor label design software, you can include many objects on your label, exactly where needed. Barcodes, logos, images, frames and many other objects can be added. App or computer: the choice is yours.

Personalised print, indoors or outside

Need labels for food containers in the kitchen? Ribbons for gift wrapping on the dining room table? Or organising the contents of your tool shed or greenhouse? The P-touch CUBE Plus is small enough to carry around the house or garden, to print wherever needed.

Design your labels whenever convenient

You carry your smartphone with you at all times. So design your labels while enjoying a relaxing coffee. Once back at home, connect to your label printer, select your label and print.

Unleash your creativity with our labels and ribbons

Over 100 different label and ribbon tapes available

Choose from so many stylish, colourful labels and ribbons up to 24mm wide: Labels with pastel shades and patterned backgrounds or sparkling gold and silver glitter. Impress with luscious wine red and navy blue ribbons or practical iron-on labels for school clothing – there is a tape cassette for all uses!

Laminated labels

Available in many colours and widths, with a durable overcoat that makes them resistant to:

- Water
- Chemicals
- Freezing
- Heat
- Abrasion
- Sunlight

Premium glitter labels

Great for gifts, events and wedding presents – offering a stylish and luxurious finish

- Choose from black on glitter gold, or white on glitter silver
- Laminated, so extremely durable in day-to-day use

Patterned labels

Ideal around the home, and are available in four different patterns:

- Black text on pink hearts
- Black text on gold geometric
- Black text on silver lace
- Black text on red gingham

Matt labels

Special matt laminated surface reduces glare

- Easier to read in bright conditions
- Available in silver, transparent, lime green, berry pink and grey label colours

Satin ribbons

Add that special touch to your presents and gifts to friends and family

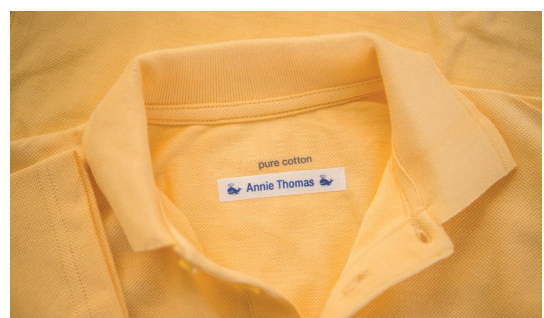

- Available in several colours including navy blue, wine red, pink and white
- Has a silky, satin finish with a premium look

Iron-on fabric labels

Perfect for school uniforms, sports kit and school children's clothing

- Blue on white label
- The special adhesive is activated when heated with a clothes iron
